DETAILED ACTION

Terminal Disclaimer

The terminal disclaimer filed on June 10, 2004 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of the patent granted to Lorton et al having Pat. No. 6,655,320 has been reviewed and is accepted. The terminal disclaimer has been recorded.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 7, 8, 10, 11, 17, 18 and 20 are rejected under 35 U.S.C. 102(b) as being anticipated by Medlin et al (6,073,586). Medlin et al teach a method of raising poultry comprising the steps of providing a facility 30 for housing the poultry having an interior 13 and providing at least one ventilation fan 21 adapted to restrict the transmission of light into the interior of the facility. It is considered that any fan in a window would restrict the transmission of light through the window to some extent. The method also comprising a step of providing a climate control device 17 for controlling the environment within the interior 13 and also having a step of providing a shutter 32 mounted to the ventilation fan 21 selectively enabling airflow therethrough which also allows for further selectively enabling the passage of light therethrough.

Allowable Subject Matter

Claims 2-6, 9, 12-16 and 19 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
